SKILLS & TECHNOLOGIES

Languages	Web Service	Database
- ROR	- AWS EC2	- Postgresql
- Coffeescript	- Heroku	- Mysql
- HTML5	- S3	- Cassandra + Kairodb
- CSS3	- MQTT	- Rethinkdb
- ReactJs		

PROFESSIONAL EXPERIENCE

Futureworkz   **2012 – Present**
Singapore web development company.

Technical Leader of Futureworkz + Co-organizer
Lead all the developers of Futureworkz Company. Worked closely with developers to plan, refactor code, solve issues and launch features related to the project management systems of web-enabled merchant services.

Responsibilities:
- Get client's requirements, advise them if there is any better way to help their project better.
- Set priorities, assigned tasks and gave feedback to developers on team.
- Find, recruit and train good candidates.
- Identified key software architecture decisions, discussed with product owner to plan best structure for future feature additions.
- Implemented coding transaction processing systems.
- Coordinated a geographically distributed team through online collaboration tools like Pivotaltracker and daily Skype calls with overseas partners.
- Designed reusable components by utilizing various standard frameworks.
- I am also a Co-organizer of http://www.meetup.com/saigon-rb/. A monthly ruby meetup group for all Rubyist from beginners to gurus.
